NEW valid from 01.07.2021

The HELIOS-PREISSER Repair-Exchange-System

How does the new system work?

For many products from the HELIOS-PREISSER product range, we offer you a convenient exchange service instead of expensive repairs. You will get a completely overhauled product in exchange for your faulty instrument, which is immediately ready for use.

What are the requirements for the repair exchange?

Products will only be exchanged with the matching exchange product from our list. This exchange product can not leave our house until the damaged product reached the service department from HELIOS-PREISSER.

Which products are included in the new system?

A lot of the latest products from our range and also selected preceding models are enclosed in the Repair-Exchange price list. The price list is sorted by item number in ascending order, so you have a really quick overview about all products. The products, which are not listed in the price list, will be calculated according to expenditure and are excluded from the Repair-Exchange-System.

How does the transaction take place ?

There are two options:
Either you handle the service with your HELIOS-PREISSER retailer or you send the faulty product directly to our service department. However you will decide, as a fair return service for your delivery, we will bear the delivery charges for the exchange product to your specialist retailer or directly to your company.

The numerous advantages of the Repair-Exchange-System

ACCURATE

You get a completely overhauled product, tested and approved and immediately ready for use. Selected products include a calibration certificate from our test laboratory.*

FAST

The outage time will be reduced to only a few days, because time-consuming cost estimation and repairs will be cancelled. The exchange product is waiting and will leave our company within 24 hours after the arrival of your product.

RELIABLE

No bad surprises regarding costs. Due to our transparent Repair-Exchange prices, you have certainty with the repair costs. And of course at the quality too.

EFFICIENT

Thanks to the Repair-Exchange-System we can make sure that you receive a completely overhauled product in exchange for your damaged instrument. This way not only the obvious problems are solved, instead the device was put to the test and meets the familiar HELIOS-PREISSER quality. Therefore we are able to grant you six months of warranty on our exchange products.
